

## About ISA

Information Systems Architects Inc.

Managing our customers' total cost of ownership in technology through innovation, education, and professional services.

[www.e-isa.com](http://www.e-isa.com)

ISA delivers enterprise-strength technology to small, medium, and large organizations by offering network security, network/application performance management solutions, and core business applications. Our products and solutions help customers make better business decisions by bringing together people and information. The solutions we offer are world-class and are used by thousands of customers worldwide.

We are committed to help our customers reduce their total cost of ownership in technology through innovation, education, and professional services. We sell computer software products, develop innovative solutions, and integrate these solutions into our customers' business environments.

Founded in 1992, ISA is a Toronto based company with Canadian offices in Toronto and St. John's.

Our Professional Services team ensures that our customers are provided with education, guidance, and mentoring in the design, development, implementation, and support of their technology environments. To ensure that every client realizes fast results and full investment value, ISA offers a wide range of customized training, consulting, and technical support services delivered on-line, on-site, and on-demand by certified ISA consultants. In addition, we offer a suite of managed services to allow our customers to outsource or offload certain operational and support functions.

At ISA we ensure that our customers' networks are secure, that they perform optimally, and that their total cost of ownership is minimized. The enterprise suite of business applications allows our customers to streamline their business processes, manage key business functions, focus their time on priority activities and drive results.
