

ISA Security Solutions

Managing our customers' total cost of ownership in technology through innovation, education, and professional services.

ISA helps businesses and organizations of all sizes design, build, and maintain their information security programs, policies, and infrastructure. We provide processes and solutions to protect data and privacy, keep your systems available, manage your environment, and meet your company and/or industry compliance objectives.

We understand that every company has a unique strategy based on their business goals, size and budget. Our goal is to understand your objectives and recommend software and hardware solutions that best fit your needs.

Solutions

Anti-Spam

Enforce security email policy and cut down on the nuisance and inefficiency caused by internet spam at the gateway, server, or desktop. McAfee, Symantec, Trend Micro, Barracuda, and NetIQ are some of our partners in this area.

Anti-Spyware

Protect against spyware and adware programs. These unauthorized hidden programs expose confidential information and also slow down performance of systems. McAfee, CA, Symantec, Trend Micro and Fortinet are some of our partners in this area.

Anti-Virus

Shield your extended enterprise network with comprehensive, multi-tiered virus protection for every system—from desktops, file servers, e-mail servers, and Internet gateways to remote and wireless devices.

Content Filtering

Block or filter undesirable, dangerous, or inappropriate internet content – these solutions help enforce security email and web policy. Websense, Clearswift, and NetIQ are some of our partners in this area.

Data Loss Prevention (DLP)

Prevent accidental and malicious loss of confidential data such as customer data, employee information, and intellectual property from all possible channels. McAfee, and Websense are some of our partners in this area.

Hard Disk Encryption

Keep your corporate assets such as laptops and servers safe and secure by encrypting data. McAfee, and GuardianEdge are some of our partners in this area.

Partners

Application Security, Inc.

ArcSight

Barracuda Networks

Blue Coat

Cisco

F5

Fortinet

Imperva

Juniper Networks

LogLogic

McAfee

Proof Point

Riverbed

RSA Security

Symantec

Trend Micro

Websense

Zscaler

Firewalls

Control network traffic between different zones of trust, protecting the perimeter and core network infrastructures. Cisco, Check Point, Juniper, Borderware, and Fortinet are some of our partners in this area.

Identity and Access Management (IAM)

Password management, directory integration, single sign-on, strong authentication and user provisioning. CA, A10 Networks, and RSA are some of our partners in this area.

Intrusion Prevention (IPS)

Network and host solutions that offer proactive threat protection against known, zero-day, DoS and encrypted attacks. McAfee, Radware, and Mazu Networks are some of our partners in this area.

Network Access Control (NAC)

Scan and assess the overall security posture of devices as they attempt to log onto your network. Continue to monitor device behavior after granting network access to protect you from hidden attacks. McAfee, and Cisco are some of our partners in this area.

Security Information Management (SIM)

Collect, consolidate, store and correlate security events from various syslogs and devices. SIM solutions are required for better real-time awareness of threats and by pressures of regulatory compliances. CA, NetIQ, and LogLogic are some of our partners in this area.

Virtual Private Networks (VPN)

Provide secure access to remote users to corporate servers. F5, and Fortinet are some of our partners in this area.

Vulnerability/Risk Management

Solutions that help classify important business assets, discover critical vulnerabilities, and take measures to defend against threats aimed at those systems/assets. McAfee, CA, and NetIQ are some of our partners in this area.
